Start spreading the news

There will be plenty of new dental products to see inside the Javits Center during the upcoming Greater New York Dental Meeting. The exhibit hall is open from December 1st to the 4th and, to help you navigate the aisles and booths in the Big Apple, DPR has highlighted 33 products that should be on your GNYDM must-see list. Each of the products has launched since the 2013 Chicago Midwinter Meeting, so take a look at the latest and greatest products that could make their way into your practice in the very near future.

PatientActivator®

Introducing a redesigned dashboard at GNYDM, this patient communications and online marketing solution delivers the next generation in automated appointment reminders, online reviews, marketing promotions, and social media integration.

Imprint™ 4

Billed as the fastest impression material on the market, this VPS impression material reportedly sets in just 75 seconds. Also, Imprint 4 VPS provides the same setting time of Imprint 3 VPS, but speeds up the set time with an active self-warming feature developed specifically for this product.

ScanX Swift

By uniting thin, flexible wireless sensors with a fast image scanner, this phosphor-plate imaging system sends images to a monitor just as quickly as rigid sensors. Additionally, ScanX Swift's sensors are said to deliver high-quality images and to be 10 times thinner than rigid sensors, which reportedly improves patient comfort.

Lubricare

This handpiece maintenance device offers sprays specifically designed for separate phases of the maintenance cycle: Spraynet, for dissolving impurities and cleaning; and Lubrifluid, for lubrication of instruments. The device holds up to 4 instruments per cleaning cycle, while cycles take 25 seconds per instrument with two choices of cleaning and lubrication modes.

NewTom VG3

Offering a dynamic, single-rotation field of view, the VG3 is said to be an important contribution to the high-performance field of view offered by its predecessor, the VGi. A modular hybrid 2D/3D system, the VG3 can start as a 2D system that is upgradable at any time to include a cephalometric sensor or 3D cone beam computed tomography with an 11" x 8" field of view.

eCEMENT™

eCEMENT offers a light-cure and dual-resin cement to ensure lithium disilicate restorations provide long-term retention of single or multiple restorations, as well as shade stability. Additionally, the radiopaque cement offers easy placement of lithium disilicate veneers, onlays, crowns, three-unit bridges and inlays.

Perfectemp 10

This material's 10:1 automix formula results in a minimal oxygen-inhibited layer for better handling and polishability, plus it provides high compressive and flexural strength. 3.4% shrinkage is said to offer an accurate fit and marginal integrity, while the material's multiple uses make it well suited for a wide range of highly esthetic restorations.

TPH Spectra™ Universal Composite

This composite provides the handling preference of choice, while a reduction in shades allows for carrying less inventory in the office. Plus, it is said to provide confidence that the chameleon shading ability of the composite will blend into the surrounding tooth structure, making the restoration indistinguishable.

Midwest® Automate™

This 4-port automated handpiece maintenance system reportedly offers accurate and consistent cleaning, lubricating and expelling. Plus, all-steel construction is said to offer durability for a longer life, while a dedicated chuck cleaning port cleans and lubes the handpiece chucking mechanism for simpler insertion and extraction of cutting instruments.

ProTaper NEXT®

These rotary files feature variable taper performance as well as an off-centered, rectangular cross-section for enhanced file strength. A rectangular core also adds greater strength as the file tracks down the canal. The axis of rotation differs from the center of mass, and as a result, only two points of the rectangular cross-section touch the canal wall at a time.

Ti-Max Z45L

This 45° handpiece is said to offer easy access to hard-to-reach molars. Also, its slim design provides excellent operability and high visibility, producing more space between the teeth adjacent to the handpiece's front and body. Also, powerful and consistent cutting reduces sectioning and third-molar extraction treatment times, as well as patient stress.
