

DAZZLING
New York City

By: Jayme McNiff Spicciatie, GNYDM

HAVING A HARD TIME DECIDING WHAT TO DO AFTER THE EXHIBIT FLOOR CLOSES?

We have some suggestions to help you navigate this exciting city. Start with a bus tour in Time's Square and spend some time exploring the city from a comfy seat with an experienced tour guide. The Ride is an interactive entertainment experience. It's a great way to see many sights at once and is just as magical at night as it is during the day time.

WHEN THE LIGHTS GO DOWN AND THE EXHIBIT FLOOR CLOSES WHERE WILL NEW YORK CITY TAKE YOU?

Roam around Grand Central Station, with its ornate early urban architecture and cavernous grand concourse. Stop at the Oyster Bar & Restaurant for a bite to eat and don't forget to try out one of NYC's best kept secrets: "The Whispering Gallery." Located right outside the restaurant, have your voice transmitted across the terminal in this unbelievable phenomenon of architectural wonder.

Take an elevator to the top of the Empire State Building to experience the most spectacular view. Walk out on the deck and see the city from above. Open 365 days from 8am – 2am, the Empire State Building is the most famous observatory in the world with one-of-a-kind views of Central Park, The Hudson River and East River, The Brooklyn Bridge, Times Square, The Statue of Liberty, and much more!

Thinking ahead. Focused on life.

Tri Auto ZX2

NEW! Breakthrough Technology for Canal Treatment

Introducing Tri Auto ZX2, a cordless endodontic handpiece with a built-in apex locator. This unit simplifies procedures while protecting the patient with innovative safety features.

- Cordless motor with built-in apex locator
- Achieve apical patency and create glide paths significantly faster with Optimum Glide Path (OGP) function
- Responsive – allows subtle and delicate manipulation of the file
- Optimum Torque Release (OTR) technology reduces the possibility of file separation and breakage
- Offers safe and efficient method for canal shaping
- Limited time, 30-day money back guarantee

*\$100 Rebate
with Purchase*

Offer expires 12/31/18,
details at Booth #4615.

OTR Function
(Optimum Torque Release)
Safer & Efficient Canal Shaping

OGP Function
(Optimum Glide Path)
Apical Patency & Glide Path Using a Motor

FREE LED clock*
Booth #4615

Displays time, date & temperature.

The New Movement in Endodontics

www.morita.com/usa

NEW YORK (CONT.)

The 2018 Rockefeller Center Christmas Tree will be lit for the first time on Wednesday, November 28th at Rockefeller Plaza, between West 48th and West 51st Streets and Fifth and Sixth Avenues. Tens of thousands will crowd the sidewalks for the event and hundreds of millions will watch it live across the globe. The Tree will remain lit and can be viewed until 9pm on January 7, 2019.

Honoring the lives of those who were lost, the 9/11 Memorial and Museum occupies 8 acres at the World Trade Center. The Memorial is a tribute to the past and a place of hope for the future. The 9/11 Memorial is free of charge and open to the public daily from 7:30 a.m. to 9 p.m. The National September 11 Memorial Museum serves as the country's principal institution concerned with exploring the implications of the events of 9/11, documenting the impact of those events and exploring 9/11's continuing significance. Admission is \$24 for adults.

Dressed in all its holiday finery, the Christmas Window Displays are a sure holiday sight to see. It's no wonder New York City is considered one of the Greatest Cities in the World! Macy's Christmas Windows feature the popular holiday movie scenes from a "Miracle on 34th Street," along 34th street and along Broadway. Stop in Macy's for a little shopping and ride the wooden escalator for a blast-to-the-past. Also, check out Saks Fifth Avenue with their wintery version of some of the Natural Wonders of the World; other must-sees are Bloomingdale's, Barney's and Bergdorf Goodman Holiday Windows.

New York City's Broadway Shows and Radio City Music Hall are the Theater District

historical icons. They're a must not be missed. See the hottest shows, our suggestions are: The Book of Mormon, Aladdin, Hamilton, or Beautiful: The Carole King Musical. Feeling festive? Why not purchase tickets to the Radio City Music Hall's Christmas Spectacular.

Journey to the top of One World Observatory, the tallest building in the Western Hemisphere, the Freedom Tower, and admire the incredible views of New York City. Marvel at the modern décor and exquisite design. The tower ascends 69 stories with an enclosed observation deck rising 1,250 ft. above street level.

See New York City from a view unlike any other, the Top of the Rock, at 30 Rockefeller from the 70th floor. Stop by at night after the exhibit floor and see NYC's lights span for miles. Top of the Rock Observation Deck is open daily until 11pm.

New York City is the greatest shopping Mecca of the world! Don't waste your opportunity to explore small boutiques for unique gifts in SOHO or the West Village then make your way up to the historic Macy's of 34th street (located at Herald Square between Broadway & 7th Avenue).

Take the family Ice skating for FREE at Winter Village in Bryant Park, open from 8am – 10pm. Wander small boutique shops and kiosks selling jewelry, local foods, decorative goods, toys and gifts for pets from artisans from around the world. Afterwards, grab a bite to eat and a cocktail at Celsius with rink-side views.

From the lively streets of Times Square to the leisurely neighborhoods on the upper Eastside and all the way down to the Charging Bull outside of the Stock Exchange, New York City offers something for everyone!

THE LOUPE MAGNIFICATION I WANTED WITHOUT NECK-PAIN

After using 2.5x loupes in dental school and early in my practice (around 7 years total), I decided to look into higher magnification. After trying out Orascoptic's 4.8x loupes I was sold on the higher magnification. I recognized these loupes were heavier but I did not take into account the effects it would have on me in the future.

I used these 4.8x loupes for the following eight years. In the last three years, I developed increasing pain in my anterior neck and shoulder.

I saw a physical therapist for the last two years, with an appointment every two weeks. The exercises would help me through the weekends, but once I was back at work with my loupes on, the pain would start all over again.

Around that time I took a week-long vacation in Playa del Carmen, Mexico with my wife and two children. I had constant neck and shoulder pain during the entire trip. Sad to say, this is the first thing that comes to my mind about that vacation. I could not quite enjoy the trip as much as my wife and kids were able to.

Searching on the Dentaltown forums I came across a dentist who posted he had a set of SurgiTel flip-up loupes that were very light and the declination angle could be adjusted to very steep angles. I looked up SurgiTel online and got my local representative's name and number. My rep was Tim Faircloth.

I spoke with Tim about my situation with my current loupes, my pain, and

what I had read on the Dentaltown forums. He told me that he could definitely help me. He took pictures of my posture with my old loupes and with the SurgiTel loupes. I could easily see how much better my posture was with the SurgiTels. Tim was very helpful throughout the entire process. His expertise with the different models of loupes and frames and knowledge in all the areas where I had questions was amazing.

After the first few days, I finalized the adjustment of my loupes and my posture. It only took about a week for me to notice a decrease in the pain in my anterior neck and shoulder.

I am very happy with my new SurgiTel FLM loupes. The pain in my neck and shoulder has reduced tremendously and is continuing to get better. I feel that SurgiTel is way ahead of the game compared to their competitors in ergonomic features. At different times in the past 3 years, I have wondered if I would have to change careers due to too much pain. Thanks to SurgiTel I no longer have to worry.

Darryl L Hatchett, DDS
Denver, North Carolina

A graduate of the UNC-Chapel Hill School of Dentistry. He has been in private practice doing general dentistry for 16 years. Dr. Hatchett lives and works in the Denver area along with his wife and two children.

Innovative tooth movement designed for the way dentists work.

See why Invisalign® Go is the intuitive way to give your patients the smile they desire. Visit Align Technology at booth #5204.

It's the new treatment designed with general dentists in mind. From its simple interface to streamlined digital workflow, Invisalign Go provides an intuitive solution for practice integration.

- Receive automated case assessments in just minutes using Invisalign Photo Uploader
- Compare multiple treatment plans side by side and make real-time modifications
- Show patients their future smile with iTero® intraoral scanner and the Invisalign outcome simulator
- Treat mild to moderate malocclusion cases
- Use up to 20 aligners with second premolar to second premolar movement
- Get outcomes you can count on with enhanced movement predictability

Come experience Invisalign Go hands-on at booth #5204!

INTERESTED IN IDENTIFYING NEW MARKETS FOR YOUR EXPORT PRODUCTS

THE U.S. DEPARTMENT OF COMMERCE'S OFFICE OF INDUSTRY & ANALYSIS IS HERE AT GNYDM TO HELP YOU DO JUST THAT!

INTERNATIONAL
TRADE
ADMINISTRATION

Industry and Analysis:

WHAT WE DO:

Industry and Analysis's (I&A) staff of industry, trade and economic analysts devise and implement international trade, investment, and export promotion strategies that strengthen the global competitiveness of U.S. industries. These initiatives unlock export and investment opportunities for U.S. businesses by combining in-depth quantitative and qualitative analysis with ITA's industry relationships.

We do this by representing the interests of U.S. industry in trade negotiations, advocating on behalf of the industry with foreign governments, publishing research on global opportunities for U.S. industry, and executing export promotion programs. Our efforts ensure that foreign markets are open for U.S. industry, and help guide U.S. businesses toward the best export markets.

WHO WE ARE:

Manufacturing

Manufacturing advocates on behalf of domestic industries, and analyzes key factors affecting global markets for manufactured products such as medical technologies to facilitate the export of U.S. goods and promote inward investment. This unit executes comprehensive competitiveness strategies that focus the entire range of policy and promotional tools to strengthen global opportunities for U.S. manufacturers.

Services

This unit assesses the global environment for service sectors including healthcare, addresses foreign market trade and investment barriers, and promotes service

export opportunities and inward investment. This unit executes comprehensive competitiveness strategies that focus the entire range of policy and promotional tools to strengthen global opportunities for U.S. service providers.

The Trade Policy & Analysis (TPA)

TPA provides data, analysis, and recommendations on policy and promotion issues affecting U.S. industry competitiveness in a global setting to maximize U.S. gains in trade negotiations. TPA addresses investment and standards-related market access barriers, evaluates the economic effects of regulatory programs, advances U.S. commercial interests on international intellectual property issues, and coordinates DOC input in World Trade Organization (WTO) committees and negotiations.

Trade Promotion

Supports the entry of U.S. industries into new markets by establishing domestic forums to showcase U.S. goods for foreign purchasers through the International Buyer Program, and certifying international forums to connect U.S. exporters with overseas clients through the Trade Fair Certification Program. In addition, we create opportunities for U.S. firms to meet on a one-to-one basis with foreign industry executives, and government officials to establish sales channels through the Trade Missions Program. Our Strategic Partnership Program works in conjunction with private corporations, trade associations, and educational institutions to leverage combined resources to further U.S. exports.

Advisory Committee Program

The Advisory Committee Program engages industry in the formulation and implementation of trade policies and programs through the administration of advisory committees composed of private sector representatives. These include the President's Export Council (PEC), Industry Trade Advisory Center (ITAC), Manufacturing Council (MC), and Travel & Tourism Advisory Board (TTAB).

Other Divisions

Other divisions within Industry and Analysis include the Trade Agreements Secretariat, which administers dispute settlement for international trade agreements; Textiles, Consumer Goods & Materials, which administers agreements to ensure a fair trading environment for those industries; and the Travel & Tourism Office, which creates a positive climate for growth in travel and tourism.

Industry and Analysis are pleased to be a part of the Greater New York Dental Meeting again this year, and it helps U.S. manufacturers of dental equipment and supplies connect with international buyers to increase export sales and support jobs in an economically-strategic sector. Come to visit Gerry Zapiain, Senior International Trade Specialist within I&A's Office of Health and Information Technology (OHIT), to begin identifying new markets for your products. OHIT is dedicated to strengthening the global competitiveness of the U.S. health and information technology industries, by expanding their access to foreign markets and increasing U.S. exports.

OHIT monitors business and economic trends in the health and IT industries and provides data on trade and global markets in these sectors. Using their industry knowledge to inform their analysis of trade policy worldwide, OHIT works to influence the development of U.S. trade policy in these sectors. OHIT participates in formal trade negotiations and other bilateral and multilateral activities to advance trade opportunities for U.S. companies. Additionally, OHIT provides industry and policy expertise to other units of the International Trade Administration and the U.S. Government and evaluates the impact of international economic and regulatory policies on U.S. manufacturers.

To find out more about what I&A's Office of Health and Information Technology can do for you, visit Gerry Zapiain in the International Business Center in the International Registration Area. You may also contact him via email at Gerry.Zapiain@trade.gov.

GNYDM 2018 IMPLANT POSTER COMPETITION

The Misch awards were presented at the Implant EXPO Reception on Sunday.

Besides a beautiful certificate, monetary awards were also given, thanks to the generosity of the ICOI and the GNYDM. The first-place award was \$1,500, the second-place award was \$750 and the third-place award was \$250.

If you'd like to present a poster presentation and have it considered in the 2018 GNYDM Poster Competition, please visit the Greater New York Dental Meeting website for updates and upcoming details at www.GNYDM.com. Everyone is welcome to submit a poster even if you are not a dentist!

The 2018 World Implant EXPO Winners are congratulated by Dr. James H. Doundoulakis, Chair, World Implant EXPO, GNYDM.

1st Place Winner:
Dmitry Klass, B.S.

2nd Place Winner:
Erin Hong, D.D.S.

3rd Place Winner:
Marco Bergamini, D.D.S.,
Juliana Gomez, B.A., &
Thomas Wiedemann, D.D.S., M.D., Ph.D.

2017 Winners of the Carl E. Misch Award for Excellence

1st Place Richard H. Clough	2nd Place Bailey Z. Proft	3rd Place Gabriel Strauss
--------------------------------	------------------------------	------------------------------

2016 Winners of the Carl E. Misch Award for Excellence

1st Place Avrekh Ariyev, B.S.	2nd Place Selina Somji, B.D.S. & Seongchan Park, D.D.S.	3rd Place Eirini Paroutoglou, D.D.S. & Stephen Chi, D.D.S.
----------------------------------	---	--

2015 Winners of the Carl E. Misch Award for Excellence

1st Place Andrew Tawse-Smith, D.D.S.	2nd Place Isabela R.T.S. Olivio, D.D.S. & Yolanda N.R. Gallardo, D.D.S.	3rd Place Judit Frankovic, Iryna Kondratenko & Helmi Ahmed
---	---	---

2014 Winners of the Carl E. Misch Award for Excellence

1st Place Meda-Lavinia Negrutiu, D.M.D., Ph.D. & Cosmin Sinescu, D.M.D., Ph.D.	2nd Place Guei-Hua Hu, D.D.S.	3rd Place Chih Chieh Liang, D.D.S.

FOR THOSE WHO WANT TO IMPROVE THE HEALTH OF THEIR PATIENTS AND SUCCEED IN THE CHANGING HEALTHCARE SYSTEM

Be a part of the initial "Essential Total Health For All Health Professionals" program at the GNYDM. While it is imperative that you practice the highest quality of patient centered care, you must also better understand the critical issues facing health professionals as they strive to succeed and excel.

The two days of exceptional panels bring together thought leaders, educators, and respected providers to discuss and share the challenges facing all of you that practice, manage and educate within the healthcare space whether private sector or community health clinic based.

The integration of oral health into primary care along with the growing needs of our most vulnerable populations in an era of innovative technology and value based care payment are challenges that you must understand to succeed. These will be directly addressed during the two day public health symposium.

I want to share some of the important "Total Health" issues facing oral health providers and the administrators that help guide the appropriate delivery of needed services.

The two panels on Tuesday bring together some of the most respected leaders in Dentistry to share their work and thoughts about the integration of Value Based healthcare payments/reimbursements. Areas that will be addressed include the changing system, i.e. insurers, and providers, and the changing population needing oral health care.

The rapidly growing senior population adds new and complex issues to an already stressed system. Approximately 58 million people rely on the Medicare program – and only about one-third of them have any coverage for oral health care. The Medicare statute currently excludes coverage for most oral health care. Nearly three out of five seniors, and more than three-fourths of low-income seniors, do not visit a dentist during a typical year. One in five seniors have untreated tooth decay. One in five seniors, and two out of five low-income seniors, have complete tooth loss.

Its tragic that in a time when new diagnostic and treatment options are available for the management of Cancer that oral cancer continues to be a prevalent issue for the dental profession. There will be an expected 51,000 new cases of oral cancer in the U.S. this year with over 20% of these resulting in related deaths. This is unacceptable and needs to be addressed by all of us. Simple oral cancer screenings can be done in minutes with early detection a critical step in preventing the tragic effects of more advanced treatment. Issues related to reimbursement, scope of practice, available new technology and practice

interest and success in providing preventive services will be discussed.

Another area of growing concern is the oral health care for those at risk, people with disabilities and those with intellectual and developmental disabilities. Many oral health care providers do not feel well enough trained or that their clinical space is not designed to manage these patients. There are an estimated fifty-six million Americans that are disabled and in need of oral health care! Those with intellectual and developmental disabilities such as those on the autism spectrum require a level of understanding and sensitivity that is clearly attainable and tremendously rewarding. It is important that all of us understand the need to provide quality, accessible care while developing the skills and confidence to manage these patients in a welcoming and sensitive manner. We are fortunate that the Tuesday afternoon panel brings together an internationally respected group of expert physicians, dentists, disability leaders and innovative educators to assist you in better understanding the needs of these patients with disabilities and how you can be better equipped to integrate these very special patients into your clinical environment.

The expansion of the dental team has been a discussion and process that has garnered quite a bit of controversy over the past few years. This is an argument that Medicine faced when the idea of adding Physician Assistants (PAs) to their team surfaced years ago. PAs have become an integral part of medical practice. We saw this within dentistry back in the 1960s when there was opposition to this new group of dental provider known as the Dental Hygienist. Can you even imagine dentistry being practiced without Dental Hygienists as part of the team? I can't.

The development of Tele-health technology has led to the "Virtual Dental Home". This has opened new pathways to address the significant issue of a patient's inability to travel to a dental office – particularly in rural communities and the frail elderly. Tele dentistry also provides a meaningful screening that can be done by an RDH affiliated with a dental practice so that preventive, noninvasive procedures can be delivered at reduced cost and with greater efficiency. This technology has provided the opportunity for dental providers to collaborate with physicians to provide better "whole person" health care. The panel on Wednesday afternoon literally brings together the national leaders of this effort who will present and discuss how they do it and how you can explore opportunities to bring Tele dentistry and the expanded role for RDHs into your practice.

Attendance at these panels is free to dental residents and dental students. Please take advantage of this very special opportunity; Registration is still open!

Jack Dillenberg, D.D.S., M.P.H.

Rethink Your Hand Files

Simplify Root Canal Preparation

General dentists and endodontists are telling us the most difficult and time consuming part of the endodontic procedure is starting the root canal preparation.

This includes finding all canals, negotiating to the terminus, and creating a smooth glide path for rotary file safety. Venta Endo has a simple and effective solution for this tedious task of beginning canal preparation. By rethinking the way you hold and manipulate the initial file you change a difficult task into an easy one with the EndoHandle.

Steps to Simplify

First, don't change the way you access the pulp chamber. Continue as you normally do to debride the pulp chamber and locate the canal orifices. After access preparation place any small #6 or #8 endodontic file into the unique locking chamber of the EndoHandle. This new pen grasp grip on the file keeps your fingers out of the way. It gives you more control and allows you a clear view of the orifice to easily find the canal. Once you have located the canal simply keep filing. The EndoHandle's tactile sensitivity allows you to control the file and penetrate tortuous canals to the terminus. Within 30 to 60 seconds of basic up/down filing the EndoHandle produces a smooth, tissue free glide path for safe rotary instrumentation. This simple technique completely eliminates the difficult and frustrating part of beginning root canal preparation.

Solving Calcified Canals

Another common frustration in endodontics is calcified canals. Venta Endo's new CalciFile, used exclusively in the EndoHandle, is

specifically designed for these tight spaces. The CalciFile is approximately four times stiffer than a standard #6 K-Type file. This allows for greater vertical pressure to be used without file buckling. Unlike standard K-Type files, the CalciFile has a smooth non-cutting surface with a gentle curved flute. This permits the file to slide down the canal without snagging on rough canal walls. The new CalciFile design directs all vertical filing forces to the tip of the file to penetrate calcified canals.

A university study was recently completed on the CalciFile's ability to reach canal patency. Over 100 canals in 55 multi-rooted extracted teeth, from the endodontic pre-clinic, were used. The CalciFile obtained 76% canal patency with less than 15 seconds of filing. When the CalciFile was used in combination with the #6 K-Type file, 91% of the canals obtained patency. Results show that the CalciFile's unique design establishes patency in less time and with less effort.

Rethink Your Hand Files at Booth #2714

GCL Systems, Inc. Booth(s): 1133
1172 W 700 N - Suite 210 Lindon, UT 84042
Phone: (801) 549-0670 Website: www.gclsystems.com
Product: Gingival Cuff Links System

Description: The Gingival Cuff Links System is a provisional healing cuff that is compatible with most major implant systems. Gingival Cuff Links placement may occur at any state of the implant process to shape soft tissue during the healing time resulting in ideal emergence profiles. The desired emergence profile created by the Gingival Cuff Links System is simple for the restorative dentist to create and place a natural looking prosthesis that is indistinguishable from a natural tooth. Additionally, no gaps occur around the final restoration virtually eliminating food impaction.

Glidewell Dental Booth(s): 4413

San Diego, CA 92131
Products: EASY FLEXIBLE PERIOTOMES

Description: EASY FLEXIBLE PERIOTOMES: THIS PRODUCT IS USED FOR MINIMIZING DAMAGE TO ALVEOLAR BONE AS IT HELPS CUT THE PERIODONTAL LIGAMENT TO DETACH TEETH FROM THE PERIODONTAL LIGAMENT TO PLACE IMPLANT IMMEDIATELY AFTER TOOTH EXTRACTION OR GENERAL TOOTH EXTRACTION. EASY FLEXIBLE PERIOTOME ADOPTS THE FLEXIBLE TYPE WHICH CAN BE BENT FREELY, AND ENSURES APPROACH TO THE TOOTH ROOT. SO THAT YOU CAN CUT OFF THE PERIODONTAL LIGAMENT VERY EASILY. IT IS 100% RUST FREE.

Primex LLC Booth(s): 1818
11547 Rose Garden Court
San Diego, CA 92131
Products: EASY FLEXIBLE LUXATORS

Description: EASY FLEXIBLE LUXATORS: IT IS A NEW EASY LUXATOR WHICH HAS FLEXIBLE AND THIN BLADE UNLIKE OTHER LUXATORS. DUE TO THIS STRUCTURAL FEATURE, THE TIP OF THE LUXATOR EASILY DIGS INTO THE PDL SPACE, SO THE DISTORTION OF TEETH FROM THE ALVEOLAR BONE CAN BE INDUCED WITH EVEN A SMALL FORCE. IT ALSO ENABLES ATRAUMATIC EXTRACTION BECAUSE IT MINIMIZES THE DAMAGE OF SURROUNDING SOFT TISSUE AND ALVEOLAR BONE.

FREE 5 MINUTE HEARING SCREENING MOBILE VAN

Time: 10:00 a.m. - 4:30 p.m. Location: Exhibit Floor Middle of Aisle 6200
Sunday, Monday, Tuesday and Wednesday

Dentists, hygienists and assistants are among professionals at risk for hearing loss due to work-place conditions. A high frequency hearing loss due to noise can occur gradually without being apparent. A ringing or buzzing in the ears is often the first sign of this noise induced hearing loss. With your busy schedule this hearing screening provides a quick convenient way to keep up with your health needs.

Protect your hearing and protect your health! Come by and have your hearing screened.

The Center for Hearing and Communication is the oldest not-for-profit, out-of-hospital hearing rehabilitation facility in the United States, serving adults, children and infants each year. If you miss the screenings at the Dental Convention, the Center offers free hearing screening at their headquarters 50 Broadway, 6th floor, New York City by calling (917) 305-7766.

ORAL HEALTH CARE IN THE U.S.: FOR WHOM, BY WHOM, AND WHO PAYS! (IS THERE A PATHWAY TO INCLUSION OF ORAL CARE IN MEDICARE?)	INTEGRATION OF ORAL HEALTH INTO AN EMERGING VALUE BASED HEALTHCARE SYSTEM	HOW GENERAL DENTISTS CAN IMPROVE THE ORAL HEALTH OF THE DISABLED AND THOSE AT RISK (MEDICALLY COMPLEX AND ELDERLY)	WILL EXPANDING THE HEALTH TEAM TO INCLUDE DENTAL HYGIENISTS IN A TELEHEALTH ENVIRONMENT IMPROVE ACCESS TO CARE, IMPROVE THE OVERALL HEALTH OF PATIENTS AND REDUCE COSTS?
Oral healthcare in the United States has continued to be a challenge for patients, providers, insurers and policy makers. This extraordinary panel helps you to better understand how to thrive in this ever changing system. By participating in this program, you will better understand the issues and leave with a clear understanding of how to be successful in navigating the system while providing quality care for your patients.	The traditional fee for service payment system for healthcare services is fading away. We have already seen this occur in various medical settings throughout the country. The change is slowly shifting the dental payment system. Dental providers have to better understand and adapt to these changes. National experts help you to better understand these changes and how to begin the transformation so you can be prepared.	There are over 57 million Americans with disabilities. The oral healthcare system, and its providers, cannot rely on specialists and hospitals to treat these individuals in need of on-going, high quality dental care. General dentists attending this session will better understand how they can be effective, successful and emotionally satisfied in treating these at risk individuals.	Dentistry has been slow to adopt an expansion of the dental team. New models have emerged in a number of states. One model that incorporates well trained dental hygienists and innovative technology – tele-health and virtual dental offices – offers a solution that many can embrace. See how this model can increase the dental team's effectiveness, and bottom line while increasing access to care.

THE INVISALIGN® EXPERIENCE

CONVERTING CONSUMERS TO PATIENTS AND DRIVING THEM TO YOUR PRACTICE

Across the country, the Invisalign Experience is inviting consumers to walk in and explore their ideal smile, learn about Invisalign treatment options, and be directed straight to a nearby provider.

CAPTURING A GREAT OPPORTUNITY WITH A GREAT EXPERIENCE

There is a significant opportunity to expand the flow of orthodontic patients by educating consumers who have thought about treatment but haven't yet gone into consultation.

The Invisalign Experience is especially effective for millennials and post-millennials who are interested in orthodontic treatment and want to experience hands on the digital tools that that can help them visualize a better smile.

The Invisalign Experience offers an inviting atmosphere and an engaging encounter that features 3D scanning that allows consumers to see what their ideal smile could look like in a matter of minutes. Large LED touch screens take them through the Invisalign treatment experience, and friendly, well-trained store employees can help them explore treatment and understand financing options before directing them to a nearby provider.

100% OF HIGHLY MOTIVATED LEADS DIRECTED TO DOCTORS

The Invisalign Experience shortens the buying cycle by educating consumers who are motivated and ready for treatment before they come into your office. Directing interested consumers to your practice allows you to reach a brand new market that is additive to your current patient base, resulting in a significant amount of incremental business.

TYPICAL INVISALIGN EXPERIENCE FLOW VISUALIZE THEIR SMILE

Consumers can choose from a variety of treatment options. The 3D scanner allows them to quickly see the differences in their smile between these different options to select the approach that works best for them.

EXPLORE THEIR OPTIONS

Interested visitors can learn about various financing options and even be pre-qualified for a loan.

CHOOSE A PROVIDER

Consumers who want to move forward can choose an Invisalign provider within their area. The Invisalign Experience concierge team will schedule the consumer as fast as possible.

CASE REVIEW AND CONSULTATION

Once a doctor receives and reviews the case, the consumer's case assets (photos, scans, treatment preference, etc.) they have the option to accept or opt out of the case. If they accept the case, a consultation that includes an in-office physical exam will be scheduled to confirm that the consumer is a good candidate for Invisalign treatment.

READY TO TREAT

Experience has shown that consumers who are good candidates for Invisalign treatment are 50% more likely to immediately start treatment if their doctor prescribes the product selected

- 4 Invisalign® Experience locations
- 10,000 consumers visited an Invisalign Experience location
- 3,500+ consumers scanned
- 2,700+ leads transferred to doctors

during their Invisalign Experience visit. That's the strength of the Invisalign Experience pre-sale experience.

COME SEE THE INVISALIGN EXPERIENCE FOR YOURSELF AT BOOTH #5204

We've brought the Invisalign Experience to the GNYDM tradeshow floor. Come see for yourself how this innovative, engaging experience is driving qualified consumers straight to providers like you.

DOCTOR BENEFITS OF FINANCING

- Zero default risk
- Competitive merchant rates
- No need to collect high down payments
- Attract more patients, boost your bottom line
- Easy online patient application

BUY A BUNDLE AND **SAVE** WITH GNYDM'S NEW CE PASSPORT

Obtain more CE Credits and save money by purchasing one of our NEW Education Bundles.

The GNYDM CE Passport Bundle includes Seminar and Essay courses.

When purchasing a bundle, attendees can register for as many Seminars and Essay courses as they want during all six days of the show.

Registration for all courses is required.

\$495.00

entitles an individual to take unlimited* seminars and essays

\$795.00

entitles a dentist and their entire staff to take unlimited* seminars and essays

*Excludes Workshops, Botox & Fillers, Sleep Symposium and Invisalign

ASM19
Annual Spring Meeting

May 9-11
Metro Toronto Convention Centre
South Building

ASM19 — YOUR LEARNING DESTINATION

Some Outstanding Speakers to Look Forward To:

Ken Hargreaves
Successful Management of Acute Dental Pain

David Clark
Better, Faster, Prettier, Stronger Composite Dentistry

Paulo Malo
State-of-the-Art Rehabilitation For Total Edentulism:
The All-on-4® Treatment Concept

John Molinari
Infection Control in the Dental Office:
It's Everyone's Responsibility

Featured Keynote Speakers

Mary Walsh — Acclaimed Comedian
Mary Walsh is best known for her multi-Gemini-award-winning work that showcases her dynamic range of hilarious characters.

Timothy Caulfield — Professor Health Law and Science Policy, University of Alberta
Professor Timothy Caulfield debunks myths and assumptions about innovation in the health sector.

NEW for 2019! ALL COURSES ARE TICKETED.

Category 2 and 3 lectures are included in your general registration fee. Register in advance for free tickets to reserve your spot. Online registration opens in **January 9, 2019**.

The Preliminary Guide will be available online in January at asm.oda.ca.

Dr. Lauro Medrano, General Chairman, receives award of excellence from the Academia Dental Internacional

International College of Dentists' Luncheon

International Leadership Breakfast

International Reception

SLEEP APNEA SYMPOSIUM SCHEDULE

ROOM #1E09

TIME	COURSE	TUESDAY, NOVEMBER 27	SPEAKER	SPONSORED BY
8:00 – 12:00pm	5220	Laser Frenectomy/What Every Dentist Treating Sleep Needs to Ask their Physicians	Various Speakers	
1:00 – 5:00pm	5225	The Digital Work Flow for Dental Sleep Medicine	Various Speakers	
WEDNESDAY, NOVEMBER 28				
8:00 – 12:00pm	6180	Does Using a Mandibular Advancement Device (MAD) Condemn the Patient to Suboptimal Treatment	Kevin Kwiecien	
1:00 – 5:00pm	6185	Financial and Insurance Expectations for Patients in Dental Sleep Medicine	Glennine Varga

J. MORITA TRI AUTO ZX2 = EFFICIENCY IN MOTION

Written by Aaron R. Welk, D.M.D. Diplomate, American Board of Endodontics

The title of this article kind of looks like a math equation. Although not truly an equation, using the new J. Morita Tri Auto ZX2 is a formula for success in today's rotary endodontic world.

There are many benefits of using a cordless handpiece. Early in my career I found it restrictive to position the handpiece when it was tethered to a base motor. One example is gaining straight line access to the distobuccal canal of a maxillary left molar. With a cordless electric handpiece, a simple inversion of the unit allows for easy access to the canal and file freedom. The cordless feature means you can adjust to all patient sizes and chair positions required for endodontic treatment.

As I fast forward 16 years in private practice as an endodontist, I have been using a cordless electric handpiece ever since. With the introduction of the Tri Auto ZX2, this latest generation cordless handpiece is making an exponential jump from previous cordless handpieces on the market.

There are five (5) different operating modes for canal shaping and measurement. There are eight (8) programmable memory settings that can be set in varying combinations of motor operation (speed, torque and automation level). The handpiece is preprogrammed for different stages of canal treatment. As the operator gets comfortable with each mode, the settings can be customized as needed.

With adjustable rotation speeds from 100-1000 rpm, the Tri Auto ZX2 can accommodate an assortment of rotary instruments from files to gates glidden and pesso burs. The optimized glide path (OGP) function creates watch-winding and balanced force motions in either 90 -120 , 180 -270 , or 240 -330 arcs. This forward and reverse rotation allows a clinician to negotiate a canal path as if using a hand file.

The Tri Auto ZX2 is whisper quiet to use. The optimized torque reverse (OTR) function used during canal shaping reverses smoothly upon increased torque in the canal. When the rotating file exceeds to set torque limit, the file automatically starts alternating between forward and 90 reverse rotation. The motor produces a soft engine sound that is non-threatening to anxious patients.

Integrated rechargeable batteries also serve as a counter weight, making the handpiece well balanced. This leads to operator comfort and less fatigue when holding the handpiece. The battery charge can easily handle 6 to 8 cases a day for a full week without needing a recharge. Another benefit is the ease of mobility between operatories in the office. This portability is useful for the freelance clinician who travels to various offices.

Unlike other handpieces on the market, the Tri Auto ZX2 is multifunctional. In addition to rotary instrumentation, it functions as a stand-alone apex locator. But, it gets better. The Tri Auto ZX2 has varying levels of automation that can be set for instrumentation in a root canal. When used in manual mode, the operator can start and stop the rotary file with the push button. Connecting the probe cord to the handpiece while using a rotary file allows automation of the procedure.

The handpiece can be set to Auto Start when the file approaches the canal and Auto Stop when the file is removed from the canal. The handpiece can also be set to stop when the file reaches the minor diameter of the canal apex in Apical Action (OAS) mode.

The J. Morita Tri Auto ZX2 will enhance the treatment experience and efficiency of any clinician regardless of practice level. When selecting your next endodontic handpiece, let the Tri Auto ZX2 guide you to the next level as it has for me.

**Vision & Ergonomics
at Work**

Up to 92.3% of clinicians report having working pain. Of those, the majority reported cervical spine pain, musculoskeletal fatigue, and vertebral disc injury.* Injuries like these can easily become chronic, and may even need surgical intervention to rectify.

SurgiTel loupes are designed to accommodate the widest range of declination angles to provide each clinician with their best ergonomics and **STOP neck pain**.

Free Retainer Strap**

*Chitnis, Deepak. "Operating with Pain: Surgeon Workplace Injury Underrecognized." ACS Surgery News 12.4 (2016): 1+. Print.

"I feel that SurgiTel is way ahead of the game compared to their competitors in ergonomic features. At different times in the past 3 years I have wondered if I would have to change careers due to too much pain. Thanks to SurgiTel I no longer have to worry."

Darryl Hatchett, DDS

"If the equipment doesn't work for the clinician, the clinician will most certainly work for their equipment! Sadly, most clinicians do work for their equipment."

Lance Rucker, DDS, AB, BScD
