## Dental Tribune Study Club to present Osseo University Summit at GNYDM

by Dental Tribune Study Club

---

**NEW YORK CITY:** The Dental Tribune Study Club will present the Osseo University Summit at 10 a.m. (EST) on Dec. 1 during the Greater New York Dental Meeting (GNYDM). The event will be presented by educators who are nationally and internationally renowned for their influence in enhancing implant education through extensive clinical experiences and diverse backgrounds.

The presenters will not only focus on theoretical scientific aspects, but will also highlight implantology techniques that are relevant for the daily practice.

The summit will be moderated by Dr. Benedict Bachstein.

Dr. Kenneth Serota (Canada) is the founder of [www.osseouniversity.com](http://www.osseouniversity.com). The site was created as a nexus of materials and informatics for those who wish to learn more than is currently accessible in traditional modes.

It has been developed around the fact that technology is one of the most powerful influential factors in education and reflects this in its content.

Attendees may register (for free) as a GNYDM visitor at [www.gnydm.com](http://www.gnydm.com) with the course No. 6080. You may also get more information at [www.dtstudyclub.com](http://www.dtstudyclub.com).
