Tri Auto ZX2

NEW! Breakthrough Technology for Canal Treatment

Introducing Tri Auto ZX2, a cordless endodontic handpiece with a built-in apex locator. This unit simplifies procedures while protecting the patient with innovative safety features.

- Cordless motor with built-in apex locator
- Achieve apical patency and create glide paths significantly faster with Optimum Glide Path (OGP) function
- Responsive allows subtle and delicate manipulation of the file
- Optimum Torque Release (OTR) technology reduces the possibility of file separation and breakage
- Offers safe and efficient method for canal shaping
- Limited time, 30-day money back guarantee

OTR Function (Optimum Torque Release) Safer & Efficient Canal Shaping

OGP Function (Optimum Glide Path) Apical Patency & Glide Path Using a Motor

CONTROVERSIES IN DENTISTRY-FINDING THE CORRECT ANSWER

Gordon J. Christensen, DDS MSD PhD Founder & CEO, Practical Clinical Courses CEO, CR Foundation-Clinician's Report

HE CURRENTLY IN VOGUE PHRASE "EVIDENCE-BASED

DENTISTRY" (EBD) IS NOT NEW. IT WAS INTRODUCED AS EVIDENCE-BASED MEDICINE (EBM) IN ABOUT 1991.

We now hear about it constantly, as though we never had evidence before this phrase was coined. It has caused consternation and anxiety among most practicing dentists. When hearing this phrase, many dentists feel that the profession has actually identified a technique, material, preventive concept, or treatment that is the best for every subject. Others are frustrated by the phrase because specific conclusions are often related to a topic as the finite and proven answer, contrary to some practitioners' observations.

Many health professionals have contributed to developing and defining evidence-based medicine/dentistry. Among them is the late Canadian/American physician Dr. David L. Sackett, who is considered by many to be the father of evidence-based medicine.

As a dental educator, researcher, and clinician for several decades, I have great admiration for Dr. Sackett's life work and his significant influence in motivating health practitioners to make medical decisions based on evidence. The challenge for practitioners is defining and determining just what is evidence.

As US dentistry has accepted this phrase and attempted to adapt it into dental practice, I feel that some enthusiastic proponents of EBD have overestimated their ability to identify the evidence that qualifies to be accepted and which does not. Additionally, some appear to not fully understand Sackett's personal intent and definition of evidence-

based medicine. Sackett taught that practitioners should know about the scientific evidence that has been produced on a given subject, but he clearly stated that the scientific evidence must be blended with the clinical experiences and observations of individual practitioners, as well as the specific conditions of individual patients. His own remarkable discovery that aspirin is an appropriate preventive drug for heart health would never meet the standards of evidence-based medicine as it is interpreted by some today.

When the "science" says some treatment is correct, and your clinical experience for a specific situation does not support it for a specific patient, on what basis do you make your clinical decision? Often your decision is blended with information from both the top and the bottom items on the list below. The hierarchy of EBM-EBD is as follows, listed from what is considered to be the most-reliable evidence to least-reliable evidence:

- Meta-analysis combines research from many studies
- · Systematic review comprehensive review of all relevant studies
- Practice guideline statement produced by a panel of experts

 Pandaminal controlled trial publicate receive randominal
- Randomized controlled trial subjects receive randomized clinical interventions
- Cohort study follows populations prospectively over time to determine over time which patient characteristics are associated with a disease or outcome
- Case controlled study retrospectively compares patients with and without (control) a disease
- · Case report what happened to a patient

Evidence-based medicine has had many critics. In the early part of Sackett's career, he was lauded by academics and challenged by clinicians. When criticized, Sackett responded: "Evidence-based medicine is not 'cookbook' medicine. Because it requires a bottom

up approach that integrates the best external evidence with individual clinical expertise and patients' choice, it cannot result in slavish, cookbook approaches to individual patient care."

Any mature dental practitioner knows that there are numerous successful ways to accomplish any clinical procedure. Many years ago, Socrates developed and has been accredited for what is currently called "problem-based learning." The concept is not new. During my career, I can identify several terminologies describing the same concept. Students are often confused and frustrated when they learn a specific "correct" concept or technique from one instructor only to be told by another instructor that another way is better. There are very few clinical situations for which there is a singular treatment or preventive approach. Many factors must be considered to make the decision.

As I peruse Sackett's writings and attempt to interpret his intent relative to EBM, I conclude that he intended practitioners to be aware of the scientific evidence that is present on any topic, but to also blend their personal clinical observations over a period of time with the scientific evidence before making clinical decisions. That point is often overlooked in the US and should be emphasized more.

THE LOUPE MAGNIFICATION WANTED WITHOUT NECK-PAIN

FTER USING 2.5X LOUPES IN DENTAL SCHOOL AND EARLY IN MY PRACTICE IAROUND TOTAL), I DECIDED TO INTO LOOK HIGHER MAGNIFICATION. AFTER TRYING OUT ORASCOPTIC'S 4.8X LOUPES I WAS SOLD ON THE HIGHER MAGNIFICATION. I

RECOGNIZED THESE LOUPES WERE HEAVIER BUT I DID NOT TAKE INTO ACCOUNT THE EFFECTS IT WOULD HAVE ON ME IN THE FUTURE.

I used these 4.8x loupes for the following eight years. In the last three years, I developed increasing pain in my anterior neck and shoulder.

I saw a physical therapist for the last two years, with an appointment every two weeks. The exercises would help me through the weekends, but once I was back at work with my loupes on, the pain would start all over again.

Around that time I took a week-long vacation in Playa del Carmen, Mexico with my wife and two children. I had constant neck and shoulder pain during the entire trip. Sad to say, this is the first thing that comes to my mind about that vacation. I could not quite enjoy the trip as much as my wife and kids were able to.

Searching on the Dentaltown forums I came across a dentist who posted he had a set of SurgiTel flip-up loupes that were very light and the declination angle could be adjusted to very steep angles. I looked up SurgiTel online and got my local representative's name and number. My rep was Tim Faircloth.

I spoke with Tim about my situation with my current loupes, my pain, and what I had read on the Dentaltown forums. He told me that he

could definitely help me. He took pictures of my posture with my old loupes and with the SurgiTel loupes. I could easily see how much better my posture was with the SurgiTels. Tim was very helpful throughout the entire process. His expertise with the different models of loupes and frames and knowledge in all the areas where I had questions was amazing.

After the first few days, I finalized the adjustment of my loupes and my posture. It only took about a week for me to notice a decrease in the pain in my anterior neck and shoulder.

I am very happy with my new SurgiTel FLM loupes. The pain in my neck and shoulder has reduced tremendously and is continuing to get better. I feel that SurgiTel is way ahead of the game compared to their competitors in ergonomic features. At different times in the past 3 years, I have wondered if I would have to change careers due to too much pain. Thanks to SurgiTel I no longer have to worry.

Darryl L Hatchett, DDS

Denver, North Carolina

A graduate of the UNC-Chapel Hill School of Dentistry. He has been in private practice doing general dentistry for 16 years. Dr. Hatchett lives and works in the Denver area along with his wife and two children.

Seminar Workshop Live Essay General Practice Residency Fair Allied/ Specialty Groups Special Event

INTERESTED IN EXPORTING? LOOKING TO IDENTIFY NEW EXPORT MARKETS FOR YOUR COMPANY'S PRODUCTS?

Join the U.S. Department of Commerce and the International Buyer Program on Tuesday, November 27 for an export-education seminar from 8:30am through 9:30am in the Exhibitor Lounge 4th floor, A terrace to learn about the opportunities and services available to help you grow your export business. Topics will include why U.S. dental equipment and materials manufacturers should export, selected international markets, and other international expertise from Commercial Service officers located overseas. A Continental breakfast will be generously provided by GNYDM.

To learn more about this seminar, the support the U.S. Department of Commerce is offering at the GNYDM show, and ways to connect with your local trade specialist, visit the International Business

Department of Commerce

Center located adjacent to the International Registration Area of the Javits Convention Center. This business center has been established to meet the needs of manufacturers and dealers interested in exporting their products, and provides international attendees with an ideal location to interact with U.S. Exporters to discuss business. In addition, it also provides support services such as meeting rooms, on-site government trade representatives, and multi-lingual interpreters.

Don't miss out on this great opportunity to gain valuable export education during GNYDM! We look forward to seeing you from 8:30am through 9:30am in the Exhibitor Lounge 4th floor, A terrace.

A FREE NEW AND UNIQUE HEALTH SCREENING COLLABORATION

Sponsored by the Greater New York Dental Meeting (GNYDM) & the New York State Academy of General Dentistry (NYSAGD)

The Greater New York Dental Meeting and the New York State Academy of General Dentistry will be offering the attendees a number of health screenings during the GNYDM's annual session.

MONDAY, NOVEMBER 26 from 2:00pm - 5:00pm

Exhibit Floor Aisle 6200

The following health screenings will be performed:

Blood Pressure

Oral Cancer

Caries

Hearing

Diabetes Risk Assessment

DENTAL MEETING

FOR THOSE WHO WANT TO IMPROVE THE HEALTH OF THEIR PATIENTS AND SUCCEED IN THE CHANGING HEALTHCARE SYSTEM

Teamwork

e a part of the initial "Essential Total Health For All Health Professionals" program at the GNYDM. While it is imperative that you practice the highest quality of patient centered care, you must also better understand the critical issues facing health

professionals as they strive to succeed and excel.

The two days of exceptional panels bring together thought leaders, educators, and respected providers to discuss and share the challenges facing all of you that practice, manage and educate within the healthcare space whether private sector or community health clinic based.

The integration of oral health into primary care along with the growing needs of our most vulnerable populations in an era of innovative technology and value based care payment are challenges that you must understand to succeed. These will be directly addressed during the two day public health symposium.

I want to share some of the important "Total Health" issues facing oral health providers and the administrators that help guide the appropriate delivery of needed services.

The two panels on Tuesday bring together some of the most respected leaders in Dentistry to share their work and thoughts about the integration of Value Based healthcare payments/reimbursements. Areas that will be addressed include the changing system, i.e. insurers, and providers, and the changing population needing oral health care.

The rapidly growing senior population adds new and complex issues to an already stressed system. Approximately 58 million people rely on the Medicare program - and only about one-third of them have any coverage for oral health care. The Medicare statute currently excludes coverage for most oral health care. Nearly three out of five seniors, and more than three-fourths of low-income seniors, do not visit a dentist during a typical year. One in five seniors have untreated tooth decay. One in five seniors, and two out of five lowincome seniors, have complete tooth loss.

Public Health Conference Its tragic that in a time when new diagnostic and treatment options are available for the management of Cancer that oral cancer continues to be a prevalent issue for the dental profession. There will be an expected 51,000 new cases of oral cancer in the U.S. this year with over 20% of these resulting in related deaths. This is unacceptable and needs to be addressed by all of us. Simple oral cancer screenings can be done in minutes with early detection a critical step in preventing the tragic effects of more advanced treatment. Issues related to reimbursement, scope of practice, available new technology and practice

interest and success in providing preventive services will be discussed.

Another area of growing concern is the oral health care for those at risk, people with disabilities and those with intellectual and developmental disabilities. Many oral health care providers do not feel well enough trained or that their clinical space is not designed to manage these patients. There are an estimated fifty-six million Americans that are disabled and in need of oral health care! Those with intellectual and developmental disabilities such as those on the autism spectrum require a level of understanding and sensitivity that is clearly attainable and tremendously rewarding. It is important that all of us understand the need to provide quality, accessible care while developing the skills and confidence to manage these patients in a welcoming

and sensitive manner. We are fortunate that the Tuesday afternoon panel brings together an internationally respected group of expert physicians, dentists, disability leaders and innovative educators to assist you in better understanding the needs of these patients with disabilities and how you can be better equipped to integrate these very special patients into your clinical environment.

The expansion of the dental team has been a discussion and process that has garnered quite a bit of controversy over the past few years. This is an argument that Medicine faced when the idea of adding Physician Assistants (PAs) to their team surfaced years ago. PAs have become an integral part of medical practice. We saw this within dentistry back in the 1960s

when there was opposition to this new group of dental provider known as the Dental Hygienist. Can you even imagine dentistry being practiced without Dental Hygienists

The development of Tele-health technology has led to the "Virtual Dental Home". This has opened new pathways to address the significant issue of a patient's inability to travel to a dental office - particularly in rural communities and the frail elderly. Tele dentistry also provides a meaningful screening that can be done by an RDH affiliated with a dental practice so that preventive, noninvasive procedures can be delivered at reduced cost and with greater efficiency. This technology has provided the opportunity for dental providers to collaborate with physicians to provide better "whole person" health care. The panel on Wednesday afternoon literally brings together the national leaders of this effort who will present and discuss how they do it and how you can explore opportunities to bring Tele dentistry and the expanded role for RDHs into your practice.

> Attendance at these panels is free to dental residents and dental students. Please take advantage of this very special opportunity; Registration is still open!

> > Jack Dillenberg, D.D.S., M.P.H. Public Health Panel. Mesa, AZ Dean Emeritus, A.T. Still University's Arizona School of Dentistry Board Chairman, Center for Oral Health

THE ACADEMY OF LASER DENTISTRY PARTNERS AGAIN WITH THE GREATER NEW YORK DENTAL MEETING TO PROVIDE UNBIASED LASER TRAINING

Essential Sessions Will Provide a Glimpse of What's Ahead at the ALD's Annual Meeting in April 2019

For the 11th consecutive year, the Academy of Laser Dentistry (ALD) will carry on its mission of providing unbiased, non-commercial laser education and training with three sessions during the upcoming Greater New York Dental Meeting.

According to ALD executive director Gail Siminovsky, CAE "We're pleased to announce that for the 11th consecutive year, ALD is sponsoring several objective CE programs, taught by some of the world's most prominent laser dentistry experts: Dr. Lawrence A. Kotlow, Dr. John Graeber and Dr. Samuel B. Low."

HERE ARE THE HIGHLY-INFORMATIVE ALD-SUPPORTED PROGRAMS SCHEDULED FOR THIS YEAR'S GNYDM:

#4350: Lasers, the New Norm for Pediatric Dentistry: Merging Medicine and Dentistry / Dr. Lawrence A. Kotlow / 11/26/2018 / 9:00 am -12:00 PM / 3 CEUs

Today's pediatric dental practice is treating children as early as a few days after birth to teenagers for a variety of problems due to Tethered Oral Tissues (TOTs) such as lip, cheek and tongue ties which can interfere with many newborn and infant developmental conditions.

Oral surgery for infants can safely and quickly be completed in the dental office using lasers with little or no complications. This discussion includes the use of lasers for the diagnosis and treatment of a variety of soft tissue surgeries for infants, toddlers, and older children as well as for treating traumatic injuries and will provide the following takeaways:

- How TOTs can affect many of the body's systems
- How the tongue is really an organ rather than just a simple muscle
- · How to treat various oral soft tissue procedures

For more information and registration details, visit http://bit.ly/2Cni16d.

#5420: Diode Laser Basic Competency Course / Dr. John Graeber - 11/27/17 From 9:00 am - 5:00 pm / 6 CEUs

This full-day program provides a detailed and focused basic competency in the use of diode lasers - one of the most popular dental wavelengths. Clinical techniques for dentists and hygienists will be reviewed including basic troughing, laser sculpting in smile design, frenectomies, and the minimally invasive laser protocol in periodontal treatment.

Techniques in low level laser therapy will be reviewed in wound healing and cellular regeneration. Attendees must demonstrate clinical simulation on pig jaws and must pass a written exam to achieve the coveted Academy of Laser Dentistry Basic Competency Letter of Completion.

This full-day course and workshop with cover the following key areas:

- Basic scientific principles in how lasers interact with dental tissues
- How to use a diode laser safely to avoid complications
- · Various tissue biotypes and fine tune diode laser

The ALD Laser Basic Competency Letter of Completion is included with successful course completion. This course serves as fulfilling the prerequisite for Standard Proficiency Certification with the ALD.

For more information and registration details, visit http://bit.ly/2RWUDBK

dental implant? Confused by the various treatment/management strategies? The introduction of the dental implant to the overall management of the patient is at an all-time high and so is the standard of care.

However, recent data demonstrate that inflammation associated with the implant is commonplace and can result in loss of the implant. The entire dental team requires successful systems and tools in place to enhance the longevity towards implant health.

This session will focus on systems utilizing safe laser wavelengths and innovative technologies to manage both mucositis to bone loss implantitis to help retain implants.

Attendees will learn the following:

- How to enhance your diagnostic skills for implantitis versus mucositis and how to script patient explanations to turn into a positive interaction
- Which laser wavelengths are indicated for the respective implant surface
- Why consider laser techniques in detoxification/decontamination

For more information and registration details, visit http://bit.ly/2ykoYIS

"These three information-packed sessions are just a small sample of the caliber and quantity of objective learning opportunities that await dentists and their teams at ALD's Annual Meeting which is being held in Dallas from April 4-6th 2019," explains Siminovsky.

The upcoming meeting's focus is "The Laser-Systemic Connection: Lighting the Way to a Healthier Mouth and Body. "We're very excited about next year's theme," explains Siminovsky. "For decades, ALD members were the unsung heroes of oral-systemic health. First by applying laser technology to treat periodontal disease and more recently, by applying light therapy to help patients suffering from the oral mucositis side-effects of chemotherapy as well as TMJ and sleep apnea and other medical conditions will all be included in the learning and discussion topics."

Registration for ALD 2019 is now open. Make reservations for your entire dental team by visiting http://bit.ly/2JPhAXp. Ask the ALD Team for special rates for Greater NY attendees.

ABOUT THE ACADEMY OF LASER DENTISTRY

The Academy of Laser Dentistry is the only independent and unbiased non-profit association devoted to laser dentistry and includes clinicians, academicians, and researchers in all laser wavelengths. The Academy is devoted to clinical education, research, and development the standards and guidelines for the

safe and effective use of dental laser technology. ALD was founded in 1993, with the merging of the International Academy of Laser Dentistry, the North American Academy of Laser Dentistry and the American Academy of Laser Dentistry. For more information, visit www.LaserDentistry.org.

Rethink Your Hand Files Simplify Root Canal Preparation

General dentists and endodontists are telling us the most difficult and time consuming part of the endodontic procedure is starting the root canal preparation.

This includes finding all canals, negotiating to the terminus, and creating a smooth glide path for rotary file safety. Venta Endo has a simple and effective solution for this tedious task of beginning canal preparation. By rethinking the way you hold and manipulate the initial file you change a difficult task into an easy one with the EndoHandle.

Steps to Simplify

First, don't change the way you access the pulp chamber. Continue as you normally do to debride the pulp chamber and locate the canal orifices. After access preparation place any small #6 or #8 endodontic file into the unique locking chamber of the EndoHandle. This new pen grasp grip on the file keeps your fingers out of the way. It gives you more control and allows you a clear view of the orifice to easily find the canal. Once you have located the canal simply keep filing. The EndoHandle's tactile sensitivity allows you to control the file and penetrate tortuous canals to the terminus. Within 30 to 60 seconds of basic up/down filing the EndoHandle produces a smooth, tissue free glide path for safe rotary instrumentation. This simple technique completely eliminates the difficult and frustrating part of beginning root canal preparation.

Solving Calcified Canals

Another common frustration in endodontics is calcified canals. Venta Endo's new CalciFile, used exclusively in the EndoHandle, is

specifically designed for these tight spaces. The CalciFile is approximately four times stiffer than a standard #6 K-Type file. This allows for greater vertical pressure to be used without file buckling. Unlike standard K-Type files, the CalciFile has a smooth non-cutting surface with a gentle curved flute. This permits the file to slide down the canal without snagging on rough canal walls. The new CalciFile design directs all vertical filing forces to the tip of the file to penetrate calcified canals.

A university study was recently completed on the CalciFile's ability to reach canal patency. Over 100 canals in 55 multi-rooted extracted teeth, from the endodontic preclinic, were used. The CalciFile obtained 76% canal patency with less than 15 seconds of filing. When the CalciFile was used in combination with the #6 K-Type file, 91% of the canals obtained patency. Results show that the CalciFile's unique design establishes patency in less time and with less effort.

THE GREATER NEW YORK DENTAL MEETING **PRESENTS** A TWO-DAY PUBLIC HEALTH SYMPOSIUM

Essential Total Health For All Health Professionals

2:00 - 5:00

TUESDAY, NOVEMBER 27

WEDNESDAY, NOVEMBER 28

Participants:

MICHAEL C. ALFANO, D.M.D., Ph.D. CONRADO E. BARZAGA, M.D. JACK DILLENBERG, D.D.S., M.P.H. ALLEN FINKELSTEIN, D.D.S.

9:00 - 12:00Tuition: \$50.00

Moderator: Jack Dillenberg, D.D.S., M.P.H.

ORAL HEALTH CARE IN THE U.S.: FOR WHOM, BY WHOM, AND WHO PAYS! (IS THERE A PATHWAY TO INCLUSION OF ORAL CARE IN MEDICARE?)

Oral healthcare in the United States has continued to be a challenge for patients, providers, insurers and policy makers. This extraordinary panel helps you to better understand how to thrive in this ever changing system. By participating in this program, you will better understand the issues and leave with a clear understanding of how to be successful in navigating the system while providing quality care for your patients.

DAVID S. GESKO, D.D.S. MICHAEL GLICK, D.D.S. ERIN HARTNETT, D.N.P. WILLIAM RILEY, Ph.D.

Course: 5150 Tuition: \$50.00

Moderator: Mark Doherty, D.D.S., M.P.H.

INTEGRATION OF ORAL HEALTH INTO AN EMERGING VALUE BASED **HEALTHCARE SYSTEM**

The traditional fee for service payment system for healthcare services is fading away. We have already seen this occur in various medical settings throughout the country. The change is slowly shifting the dental payment system. Dental providers have to better understand and adapt to these changes. National experts help you to better understand these changes and how to begin the transformation so you can be prepared.

ANN M. BATTRELL, M.S.D.H. PATRICIA BRAUN, M.D., M.P.H. JACK DILLENBERG, D.D.S., M.P.H. PAUL GLASSMAN, D.D.S., M.B.A.

Course: 6260 9:00 - 12:00 Tuition: \$50.00 3 CEUs

Moderator: Steve Perlman, D.D.S.

HOW GENERAL DENTISTS CAN IMPROVE THE ORAL HEALTH OF THE DISABLED AND THOSE AT RISK (MEDICALLY COMPLEX AND ELDERLY)

There are over 57 million Americans with disabilities. The oral healthcare system, and its providers, cannot rely on specialists and hospitals to treat these individuals in need of on-going, high quality dental care. General dentists attending this session will better understand how they can be effective, successful and emotionally satisfied in treating these at risk individuals.

Participants:

MATTHEW HOLDER, M.D., M.B.A. JOHN D. KEMP, J.D., CEO MAUREEN PERRY, D.D.S. MARK WOLFF, D.D.S.

Course: 6270 1:30 - 4:30Tuition: \$50.00

Moderator: Jack Dillenberg, D.D.S., M.P.H.

WILL EXPANDING THE HEALTH TEAM TO **INCLUDE DENTAL HYGIENISTS IN A TELE-**HEALTH ENVIRONMENT IMPROVE ACCESS TO CARE, IMPROVE THE OVERALL HEALTH OF PATIENTS AND REDUCE COSTS?

Dentistry has been slow to adopt an expansion of the dental team. New models have emerged in a number of states. One model that incorporates well trained dental hygienists and innovative technology – tele-health and virtual dental offices – offers a solution that many can embrace. See how this model can increase the dental team's effectiveness, and bottom line while increasing access

YOUR PRACTICE GROWTH PARTNER:

ITERO ELEMENT 2® AND ITERO ELEMENT FLEX™ INTRADRAL SCANNER TECHI DELIVERING AN EXPERIENCE TO YOUR PATIENTS

he iTero scanner is the digital intraoral system that has continued to evolve and expand with a growing range of preventative, restorative and orthodontic treatment planning solutions for comprehensive patient care. It is a fullcolor visualization imaging system with power, speed, precision, mobility options and greater portability designed to fit the needs of the dental practice and laboratories.

PROVEN RESULTS:

- · 2.4 million+ restorative crown, bridge, and custom implant cases
- 6.3 million+ orthodontics cases, including over 3 million Invisalign treatment-related scans.

Bring the power of chairside visualization to your practice by showing patients a picture of what is possible with TimeLapse tool, Invisalign Outcome Simulator and a lot more features! Get first-hand experience and speak with our Align Sales Representatives.

- iTero + glidewell.io™ In-Office Solution enhances your everyday restorative experience by providing flexibility in the way you prescribe and deliver dental restorations. The glidewell io solution is a versatile suite of technologies that empowers clinicians, providing an immediate portal to Glidewell Laboratories and the ability to create restorations right in the practice. Visit Glidewell booth #4413
- NEW! iTero and exocad® chairside seamlessly connects both systems' CAD software to provide you a fully digital workflow solution for efficient scanning, design and production of in-house dental prostheses. Visit exocad booth #2000 for a demonstration.

Visit Invisalign® and iTero® at the Greater New York Dental Meeting booth #5204 to see for yourself the products, education, and advances in consumer awareness that are designed to connect patients with doctors like you. Come experience for yourself:

- iTero® intraoral scanning for restorative and orthodontic workflows, featuring chairside milling and direct office management software communication.
- •Invisalign® Go, a new, simpler way to offer Invisalign treatment to your patients, with predictable outcomes and a complete digital workflow that fits right into your practice.
- Invisalign Experience location replica in the booth, showing you how our physical locations across the country are delivering qualified consumers to you for treatment. Also, come see our BRAND NEW consumer awareness campaign taking place across New York City.

Visit us at GNYDM booth #5204 to learn more and for a chance to win* a free iTero Element scanner (valued at up to \$32,000).

* Must visit the Align Technology booth during exhibit hall hours and complete a short survey to be entered into the raffle to win. If attendee is not eligible for the raffle prize won, they will be offered an Apple® iPad in lieu of the original prize. Recipients are responsible for following all state/local laws or employment restrictions pertaining to receiving and reporting gifts in your state of residence. Please remember that your state may ban gifts of any value or limit the monetary value of gifts you can accept.

J. MORITA TRI AUTO ZX2 = EFFICIENCY IN MOTION

Written by Aaron R. Welk, D.M.D. Diplomate, American Board of Endodontics

he title of this article kind of looks like a math equation. Although not truly an equation, using the new J. Morita Tri Auto ZX2 is a formula for success in today's rotary endodontic world.

There are many benefits of using a cordless handpiece. Early in my career I found it restrictive to position the handpiece when it was tethered to a base motor. One example is gaining straight line access to the distobuccal canal of a maxillary left molar. With a cordless electric handpiece, a simple inversion of the unit allows for easy access to the canal and file freedom. The cordless feature means you can adjust to all patient sizes and chair positions required for endodontic treatment.

As I fast forward 16 years in private practice as an endodontist, I have been using a cordless electric handpiece ever since. With the introduction of the Tri Auto ZX2, this latest generation cordless handpiece is making an exponential jump from previous cordless handpieces on the market.

There are five (5) different operating modes for canal shaping and measurement. There are eight (8) programmable memory settings that can be set in varying combinations of motor operation (speed, torque and automation level). The handpiece is preprogrammed for different stages of canal treatment. As the operator gets comfortable with each mode, the settings can be customized as needed.

With adjustable rotation speeds from 100-1000 rpm, the Tri Auto ZX2 can accommodate an assortment of rotary instruments from files to gates glidden and pesso burs. The optimized glide path (OGP) function creates watch-winding and balanced force motions in either 90 -120 , 180 - 270 , or 240 -330 arcs. This forward and reverse rotation allows a clinician to negotiate a canal path as if using a hand file. When used in manual mode, the operator can start and stop the rotary file with the push button.

The Tri Auto ZX2 is whisper quiet to use. The optimized torque reverse (OTR) function used during canal shaping reverses smoothly upon increased torque in the canal. When the rotating file exceeds to set torque limit, the file automatically starts alternating between forward and 90 reverse rotation. The motor produces a soft engine sound that is non-threatening to anxious patients.

Integrated rechargeable batteries also serve as a counter weight, making the handpiece well balanced. This leads to operator comfort and less fatigue when holding the handpiece. The battery charge can easily handle 6 to 8 cases a day for a full week without needing a recharge. Another benefit is the ease of mobility between operatories in the office. This portability is useful for the freelance clinician who travels to various offices.

Unlike other handpieces on the market, the Tri Auto ZX2 is multifunctional. In addition to rotary instrumentation, it functions as a stand-alone apex locator. But, it gets better. The Tri Auto ZX2 has varying levels of automation that can be set for instrumentation in a root canal.

When used in manual mode, the operator can start and stop the rotary file with the push button. Connecting the probe cord to the handpiece while using a rotary file allows automation of the procedure.

The handpiece can be set to Auto Start when the file approaches the canal and Auto Stop when the file is removed from the canal. The handpiece can also be set to stop when the file reaches the minor diameter of the canal apex in Apical Action (OAS) mode.

The J. Morita Tri Auto ZX2 will enhance the treatment experience and efficiency of any clinician regardless of practice level. When selecting your next endodontic handpiece, let the Tri Auto ZX2 guide you to the next level as it has for me.

6 SPECIALTY MEETINGS FOR EVERYONE

FREE PRE-REGISTRATION

MEETING DATES: NOVEMBER 29 - DECEMBER 4

EXHIBIT DATES: DECEMBER 1 - DECEMBER 4

STOP Neck Pain

with Ergonomic Loupes

- Patented ergonomic loupe designs allow clinicians to stay upright in a neutral, ergonomic posture, avoiding injury
- Maximum ergonomics at all magnifications (2.5x to 8.0x)

Vision & Ergonomics at Work

*Chitnis, Deepak. "Operating with Pain: Surgeon Workplace Injury Underrecognized." ACS Surgery News 12.4 (2016): 1+. Print.

"I feel that SurgiTel is way ahead of the game compared to their competitors in ergonomic features. At different times in the past 3 years I have wondered if I would have to change careers due to too much pain. Thanks to SurgiTel I no longer have to worry."

Darryl Hatchett, DDS

"If the equipment doesn't work for the clinician, the clinician will most certainly work for their equipment! Sadly, most clinicians do work for their equipment."

Lance Rucker, DDS, AB, BScD

Up to 92.3% of clinicians report having working pain. Of those, the majority reported cervical spine pain, musculoskeletal fatigue, and vertebral disc injury.* Injuries like these can easily become chronic, and may even need surgical intervention to rectify.

SurgiTel loupes are designed to accommodate the widest range of declination angles to provide each clinican with their best ergonomics and **STOP neck pain**.
