Assoc., Prof & Dir., Predoctoral Prosthodontics & Maxillofacial
Prosthetics, Columbia Univ.

DEBUNKING THE MYTHS OF ORAL LESIONS

BILLY BALLARD, M.D., D.D.S.
Interim Dean, School of Medicine; Prof. and Chrmn., Dept. of
Pathology, Anatomy and Cell Biology, Meharry Medical College

Panel Discussion with Q&A to Follow.

This symposium provides a comprehensive overview of the current surgical and medical management of oral and oropharyngeal cancer patients. Diagnostic criteria, rehabilitative medicine and guidelines for oral cancer management are discussed by leading experts in Otolaryngology, Pathology, Craniofacial Surgery, Oncology and Maxillofacial Prosthetics.

Learn to:

- discuss the guidelines for oral cancer management and the role of the community dentists and otolaryngologists in the management regimen
- explain the diagnostic criteria of potentially malignant and malignant oral lesions and understand how to apply the criteria to standard of care in community practice
- describe the rehabilitation concerns of oral cancer patients and understand the role of rehabilitative medicine
- discuss how community dentists and otolaryngologists can partner with cancer specialists in the overall care of oral cancer patients
