WELCOME TO THE 2023 GREATER NEW YORK DENTAL MEETING™

**THE LARGEST
DENTAL MEETING
IN THE UNITED STATES**

HeyGears to Showcase Cutting-Edge Dental Solutions at GNYDM 2023

HeyGears, a key innovator in dental technology, announces its participation in the renowned 99th Annual Greater New York Dental Meeting (GNYDM). This esteemed event, considered one of the largest Dental Congresses in the United States, will take place from November 26th to November 29th, at the prestigious Jacob K. Javits Convention Center of New York.

As a dental 3D printing solutions provider, HeyGears will be stationed at Booth No.4006, where they will unveil their state-of-the-art solutions that help change the dental field. With a primary focus on HeyGears UltraCraft Chair-Side, ChairSide Pro 3D printers and the new-launched LT Crown Resin, HeyGears aims to provide dental professionals with cutting-edge tools that deliver exceptional results.

Visitors to the HeyGears booth can expect an immersive experience, where they will both experience the advanced 3D printers, Resins and solutions. Especially, the showcased LT Crown Resin demonstrates HeyGears' dedication to providing high-quality materials that ensure patient comfort and optimal treatment outcomes.

UltraPrint-Dental LT Crown UV 3D printing resin with ceramic filler, is ideal for dental applications including permanent crowns, inlays/onlays, veneers, and All-On-X cases. It caters to the

growing needs of dental clinics and works seamlessly with HeyGears UltraCraft C series, making it suitable for All-On-X same-day implants and chairside production of permanent crowns/bridges.

One notable application of LT Crown UV is All-on-X, where temporary dentures need to be worn on the same or following day. These dentures are typically fabricated manually by an on-site technician or using PMMA milling methods. With LT Crown UV, same-day delivery is achievable through a rapid 25-minute 3D printing process, only needs 1 minute of pre-processing and 10 minutes of post-processing. Notably, its flexural strength of approximately 138 MPa ensures excellent durability in dental applications.

sales@heygears.com
+1(949)418-9418 (USA)

LT Crown UV is suitable for the fabrication of permanent crowns, inlays and onlays. When used for chair-side production, it offers economic advantages by reducing both costs and time associated with single restorations. Not only does it support expedited delivery, minimizing patient waiting time, but it also ensures the production of intricate and complex structures without compromise. This makes LT Crown UV an optimal choice for achieving an efficient chair-side workflow with high quality outcomes in restorative dentistry.

HeyGears eagerly anticipates the GNYDM as an opportunity to interact with industry professionals, dental practitioners, and potential partners. This event serves as a valuable platform for knowledge exchange, networking, and staying at the forefront of advancements in the dental field.

Discover the future of dentistry at Booth 4006 during GNYDM 2023. Join HeyGears and experience firsthand the latest advancements that are revolutionizing the field.

Zolar Technology Mfg. Co. Inc.	1200 Derry Rd. East Mississauga, Ontario, Canada L5T 0B3	4620	www.zolartek.com/	905-593-3605	Photon Exe - Dental Diode Laser	The Photon Exe Dental Diode Laser is a surgical device designed for a wide variety of oral soft tissue procedures. This high-performance device is classified as Class 4 and operates at a wavelength of 810nm, delivering an output power of 3W. Its robust capabilities make it an ideal tool for a diverse range of surgical and Low-Level Laser Therapy (LLT) applications. In surgical procedures, a 3-watt laser operating at 810nm proves invaluable for tasks necessitating exact tissue cutting or coagulation. This specific wavelength ensures pinpoint accuracy in tissue targeting while mitigating potential damage to adjacent areas. Low-Level Laser Therapy (LLT), fosters tissue healing, diminishes inflammation, etc.
TruAbutment	17666 Fitch Irvine, CA 92614	3016	www.truabutment.com	714-956-1488	AOT Plus	The AOT Plus offers a unique advantage as it can be directly integrated with fixed overdentures while eliminating the necessity for ti-base cementation. The use of a partial bar-shaped custom abutment provides a practical solution for mitigating the challenging cantilever pressure issue. This product not only simplifies the procedure but also allows for a reduction in the height of overdentures. Additionally, the inclusion of a broader scan body surface area contributes to minimizing errors during the scanning process, ensuring greater precision and reliability in the final prosthesis.
TruAbutment	17666 Fitch Irvine, CA 92614	3016	www.truabutment.com	714-956-1488	T-markers	TruAbutment's T-markers are the newest way to incorporate an everyday device to the dental photogrammetry. All you need is a T-markers kit and an Iphone 14 pro or higher with an iOS 16 or newer. The set of markers will be detected to translate the implant positions for edentulous patients to an iPhone application, which may be exported to any CAD software in the market for the prosthesis design. This workflow will crease portability and convenience for dental implant patients and clinicians.
Cranberry USA	828 San Pablo Ave. Pinole, CA 94564	4013	www.cranberrusa.com	707-655-4634	Cranberry Bio Nitrile Powder-Free Exam Gloves	Cranberry's Bio Nitrile offers an environmentally friendly alternative to traditional nitrile gloves without sacrificing performance or regulatory compliance. Advanced biodegradable properties formulated to attract microbes in landfills to break down 80% of the glove in less than 1.5 years.
Carestream Dental, LLC	3625 Cumberland Blvd., Suite 700 Atlanta, GA 30339	3217	www.carestreamdental.com		Easy Digital Denture Solutions	The once highly time consuming and complicated task of scanning dentures is now streamlined with a new digital workflow. Scan your dentures in a Carestream Dental CBCT's system to capture all necessary data in one scan in less than five minutes. In a few easy steps, EDOS can cut tedious stages from your denture workflow and save you time. Designed for simplicity and scalability, EDOS frees up time for you and your team.

The logo for the Greater N.Y. Dental Meeting 2024. It features the word "GREATER" in white, stacked vertically on the left. To its right is a large, bold, magenta "N.Y.". Below "N.Y." is the text "DENTAL MEETING" in magenta, followed by a registered trademark symbol (®). At the bottom, the year "2024" is displayed in white, with each digit inside its own magenta square. The background is white with faint, repeating patterns of the Statue of Liberty and the text "GREATER N.Y." in light blue and magenta.
